What do Kenne Bell Supercharger Kits include?

We're frequently asked what components are included in our kits. All kits include the major components (supercharger, manifolds etc) pre-assembled and tested and ready to bolt on the engine. All hardware (nuts, bolts, hoses, brackets, belt, gaskets, wiring etc.) and other necessary components are included, along with complete detailed installation instructions. Nothing else is required. We do recommend a fresh set of 1 heat range cooler spark plugs Tech Info "Spark Plug Recommendation". Any transmission enhancements are accomplished with our CHIP, SWITCH CHIP® or FLASH TUNER. The easy to read matrix will tell you exactly what components make up a particular kit. See Tech Tips for specific recommendations on other bolt on products i.e. whether or not they produce any power gains etc.

***TUNER KITS:** *Tuner Kits available. See separate parts listing for options, adds and deducts.*

X Included in kit.

☑ Kenne Bell Knock Alert System with LED Knock Display *(Dodge & Jeep engines weren't factory equipped with a knock protection system)* .

☒ OEM knock protection system modified for additional protection against knock.

☐ Not included, but (1) heat range cooler spark plug ALWAYS highly recommended. Gap at .025".

■ Available with CAK or 50 State Legal. Check literature.

***Note:** All transmission upgrade modifications include improved shifts, torque management re-cal, optimized shift points etc.*
